Recruitment Announcement: Chemistry / Food Science Summer Internship
March 18, 2015

Grocery Manufacturers Association (GMA) is the leading trade association serving the food, beverage and consumer products industry worldwide. We promote sound public policy, champion initiatives that increase productivity and growth, and help to protect the safety and security of food and consumer products through scientific excellence.

GMA is currently seeking results-oriented, self-starting summer interns to join our Science team.

GMA internships are full-time: 10 weeks (27 hours per week, $10 - $12/hr) with metro pass.

**Begin Date:** Monday, June 1, 2015; **End Date:** Friday, August 7, 2015

The student will learn technical trouble-shooting of food production problems through analytical chemistry techniques: Gas Chromatography and Mass Spectrometry.

Duties will include: responding to GMA Member requests for analysis, and assisting with the Food Industry Analytical Chemists (FIAC) Share Group special projects.

There will be day-to-day team involvement and participation in specific assignments using analytical techniques: GC/MS, along with Microbiology, FT- IR and SEM.

Potential applicants will have completed 2nd or 3rd year requirements of a Chemistry or Food Science program, with analytical, organic and/or biochemistry or Food Chemistry course work with lab (required).

These positions are excellent opportunities to be an active partner in a team of professionals and to understand the critical role of trade associations in government, politics, and science. If you are interested in applying for this exciting opportunity listed above, please send your cover letter and resume to Joy Babineaux at: recruiter@gmaonline.org and reference the specific position.
