Food and Sustainability

Mahidol University, Thailand

From production to consumption, explore issues that drive the global food industry-Sustainability, Food Safety, and Food Security-in 3 different regions in Thailand: Kanchanaburi, Phetchabun, and Nakhon Pathom!

During this two-week course, you will:

- Understand the relationship of food sustainability and safety through the lens of the diversity of food operations and access in a confined geographic area
- Have hands-on learning experience through day trips to agricultural production sites, food companies, and wet/dry markets
- Meet local experts and learn their sustainable production practices and agricultural practices

SCHOLARSHIPS AVAILABLE!
